Dear Ms Thompson

I have received your email below but I don't think I have seen your original email. I have however seen Mr Adamson's letter and I have spoken with him on the telephone.

In answer to your question, the Strategic Housing Land Availability Assessment does not allocate land. It identifies land with housing potential. Mr Adamson's land has been identified in our annual housing land assessment since 2007. It is an evidence base report required by national planning policy and as the land concerned is safeguarded for future development in our Replacement Unitary Development Plan (adopted April 2006), it is necessary for it to be identified.

If you require any further information please contact me or my colleagues David Kearsley or Martin Stuart

Yours sincerely

Nick Clarke

Planning Policy team

Dear Sirs

I am still waiting for a reponse to my email below.

Yours faithfully
Irene Thomson

Dear Sirs

It has been noticed that even though you have received communication from a landowner in Lowton (see attached letter) you have still allocated his land in the SHLAA tables.

Could you please explain why?

Regards
Irene Thomson
